

# UNLOCK THE TRUE PERFORMANCE OF YOUR RATION

**On-farm trials confirm cows fed Optipartum-C+ make more money.**

- ✓ Improves **milk yield**
- ✓ **Reduces starch excretion**
- ✓ Enhances **bulling rates**

**Easy to use...**

No need to change the ration.

Simply add 40g/cow/day to your TMR for a minimum of 30 days to see the effect.

# HOW TO USE FOR BEST RESULTS

Do you see **undigested feed** in the **dung**?

- 1** Minimum **20% starch** in the total ration (DM)
- 2** Add **40g/cow/day** Optipartum-C+ Conc. for at least 30 days
- 3** **Don't change anything else** in the ration for the evaluation period
- 4** Collect **detailed milk records** before and after adding Optipartum-C+ (Cow IDs, DIM, Kg Milk, Fat%)

## What to monitor:

**1 week:** Changes in dung consistency due to enhanced digestion

**3 weeks:** Changes in milk yield & constituents

## What is Optipartum-C+?

**OptiPartum-C+** is designed to improve digestion of the ration. The complex blend of natural ingredients includes E/ZYM™ - a source of natural bio-complexes to enhance the breakdown of starch & fibre - **releasing more energy previously locked away within the ration.**

### Optipartum-C+ Concentrate

TMR / Concentrate Blends / Premix

A **super-concentrated** Optipartum-C+ formulation designed to be added direct to your TMR (mixer wagon), concentrate blend or mineral pack - to make life easy.

- Added into feed @ 40g/cow/day
- 20kg bags / 1T pallet
